Research Interest: RF sensing, wireless networking and dynamic spectrum sharing

EDUCATION

Washington University in St. Louis Sept. 2019 - present
Ph.D. in Electrical Engineering (Advisor – Prof. Neal Patwari) (**GPA**: **3.98/4.0**) *Missouri, USA*

Sichuan University Sept. 2015–June 2019
B.S. in Electronics and Information Science and Technology (**GPA**: **3.80/4.0**) *Sichuan, China*

Sichuan University Sept. 2017–June 2019
B.A. in English (**GPA**: **91.4/100**) *Sichuan, China*

PROFESSIONAL EXPERIENCE

Research Assistant | Washington University in St. Louis **Sept. 2019 - Aug. 2020**

Project: Shadow Fading Modeling for Efficient and Accurate Received Power Prediction.

- Implemented a spatial loss field for correlated shadow fading prediction.
- Validated the proposed solution via latency and accuracy using both indoor and outdoor real-world datasets.

Project: Full-Duplex Spectrum Monitoring for Open Software-defined Radio Platforms.

- Developed a full-duplex monitoring system which enables simultaneous and continuous monitoring of the environment and platform's transmissions in a wide spectrum for shared spectrum compliance.
- Implemented the system on POWDER, a city-scale wireless testbed for real-world RF spectrum monitoring.

Project: Received Power Based Vital Sign Monitoring.

- Implemented a received power based estimation algorithm for simultaneous respiration and pulse rate monitoring.
- Evaluated the algorithm's performance via experiments at various locations and with different subjects.

Project: Received Power Based Device-free Localization and Tracking.

- Implemented custom-designed embedded system programming for wireless sensor networking and communication.
- Simulated link crossing speed estimation for indoor localization and tracking via received power.

Teaching Assistant | Washington University in St. Louis **Jan. 2021 - Dec. 2021**

Course: Communications Theory and Systems (ESE 471) with Dr. Neal Patwari.
Course: Probability and Stochastic Processes (ESE 520) with Dr. Vladimir P. Kurenok.

COURSEWORK

- Detection and Estimation Theory • Machine Learning • Digital Signal Processing • Bayesian Optimization
- Probability and Stochastic Processes • Large-Scale Optimization for Data Science • Data Mining
- Computer Networking • Wireless Sensor Networks • Equity and Fairness in Estimation and Classification

ACADEMIC SERVICE

- ACM SenSys Shadow Program Committee, 2022.
- ACM IPSN US Session Host, 2020.

SELECTED HONORS AND AWARDS

- iREDEFINE Professional Development Award, 2022.
- Top 1% Outstanding Graduate of Sichuan Province, 2018.
- Top 1% China National Scholarship, 2017/2018.
- Top 0.5% Li-xin Tang Scholarship

SKILLS

- **Programming:** Python, C, C++, JavaScript, MATLAB, Bash.
- **Tools:** GNU Radio, MATLAB & Simulink, Altium, PhantomNet, PyTorch, Multisim, Visual Studio.
- **Languages:** Fluent in English, native in Chinese.
- **Operating Systems:** Ubuntu, MacOS, Windows, Debian
